## Safe & Secure

Most responsible operators would be aware of legal obligation to safely use dangerous substances when on the job but what happens to the little bit left over? Where is the

Our Lift and Shift Service in action

designated storage that is both safe and secure? Purchase the bunded Chemical Shed without delay and fulfil your responsibility to your workers and/or your customers, You will be surprised at how reasonable the price is. What's more, you will be satisfied knowing you're chemicals are stored securely

## Chemical Shed Features

The Hazchem storage Chemical Sheds measure 3.0m long by 1.5m wide, a very appropriate size for storing dangerous chemicals.

To ensure maximum safety the Chemical Sheds include the following features:

- A bunded pre-cast concrete floor
- Two ventilation ports
- Drainage outlets on shed base
- Steel shelving for storage
- Braced door for strength and security
- Necessary warning and safety signage
- We offer these sheds fully assembled and attached to the base
- Fully lockable hinged door
- Lift and Shift Service to your site

### Alternative Sizes

Alternative sizes of sheds are available from the MC Construction range with the vents available as options. Precast slabs are not available for these sizes but an onsite concrete bunded floor is available.

## When Purchasing

### Customer Responsibility

To determine suitability of this product for storage of any quantity, type or combination of substances and to comply with any statutory requirement, including the correct use of signage and site location of shed. To provide a clear and level base (a layer of gravel works best) and suitable vehicle access to the site for a hiab delivery truck.

## How to Design and Order

We offer a design, create and install service to all customers. We specialise in kitsets and well as purpose built projects to suit the customers need. Perhaps most importantly, we understand the requirements for a safe and secure environment.
